

Safely Remove Oil Saturation & Restore Ball Performance With the Revivor

- **The Revivor is a self-contained unit that safely removes oil from reactive and proactive coverstocks.**
- **This process restores ball performance by using heat to draw the oil from the bowling balls.**
- **Drawing out the oil by the use of thermal reaction is a proven method of bringing back the original characteristics of the ball.**
- **The Revivor removes the oil with an even, digitally controlled heat pattern so as not to damage the bowling ball.**
- **Balls should have the oil extracted approximately every 40 to 50 games, depending on the lane conditions and the level of performance each bowler wishes to maintain**

\$25.00 each ball

**Revivor Package
Oil Extraction, Resurface
& New Grips
\$50.00 each ball**
